# Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the

Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected: and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Wilma Johnson, CDC Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

## **Proposed Projects**

1. Follow-Up Study of Children With Developmental Disabilities—New—In the mid-1980s, 10-year-old children were identified as having one or more of five developmental disabilities: mental retardation, cerebral palsy, epilepsy, hearing impairment, or vision impairment. These children were identified (mainly from special education records in the public schools) in the metro-Atlanta area as part of a study to develop surveillance methods for these conditions in school-age

children. A follow-up study is proposed to trace, locate, and interview these children, who are now in their early twenties, to assess their status with regard to educational attainment, employment, living arrangements, services received, functional limitations, adaptive behavior, social participation, health, and quality of life. Previous studies (published mostly in the mid-1980s) on the post-secondary school experiences of former recipients of special education services were either limited to one type of impairment (e.g., mild mental retardation) or were restricted to a narrow range of outcomes (e.g., employment and education) or did not incorporate a comparison group of persons who were not in special education. The proposed study is a onetime, in-person interview and includes a contemporaneous comparison group of persons who, at age 10 years, were in regular education classes in the same schools as were the persons with developmental disabilities. A base of 1,608 identified children and 650 comparison persons will be used to find a total of 1,600 who will be interviewed. The data generated from this study will be used to estimate the burden of secondary health conditions, limited social participation, and economic disadvantage among young adults with long-standing developmental impairments. This information will be helpful to efforts aimed at the prevention of various secondary problems in this population. The total cost to respondents is \$0.

Respondents	Number of respondents	Number of responses/ respondent	Avg. bur- den/re- sponses (in hrs.)	Total bur- den (in hrs.)
Initial Location Call Contact Call Scheduling Call Telephone Interview	2,258 1,900 1,600 1,600	1 1 1 1	.08 .17 .08 1	180 323 128 1600
Total				2231

Dated: July 9, 1997.
